COLOUR PALETTE

The trend for darker colours for office reception furniture has changed as people have started experimenting with lighter and brighter hues. While darker shades are best to hide dust particles, lighter ones, on the other hand, make the space look all the more appealing. "A few bright-coloured furniture pieces in the reception give a vibe of informality and relaxation. While colours add to the brightness, the reception desks should be monolithic and minimalistic; thereby hiding the clutter and focusing on branding of the organization," says **Amit Khanna**, Principal Architect, **Amit Khanna Design Associates**. Also, colours should be chosen as per the work profile of the organization.
